PLASTIC BOTTLES: Everyday Use, Hidden Problem

! THE PROBLEM

Products we consume for health, like juices, are often packaged in plastic bottles, which can **leach harmful chemicals**—making something meant to benefit us potentially harmful instead.

Excessive use of plastic bottles for packaging food and beverages poses a serious **health risk to consumers**.

Most plastic bottles are designed for single use, and when discarded, they **harm the environment**—eventually impacting our hygiene and health through pollution and contamination.

VS

✓ THE SOLUTION

Our eco-friendly bottles ensure your drinks stay pure and safe—no harmful chemicals, just natural goodness in every sip.

A healthier choice for you and your family, reducing health risks associated with plastic usage.

Reusable, durable, and eco-friendly—our bottles help reduce plastic waste and protect our planet for a better tomorrow.

SAY NO TO PLASTIC
It harms you. It harms nature.

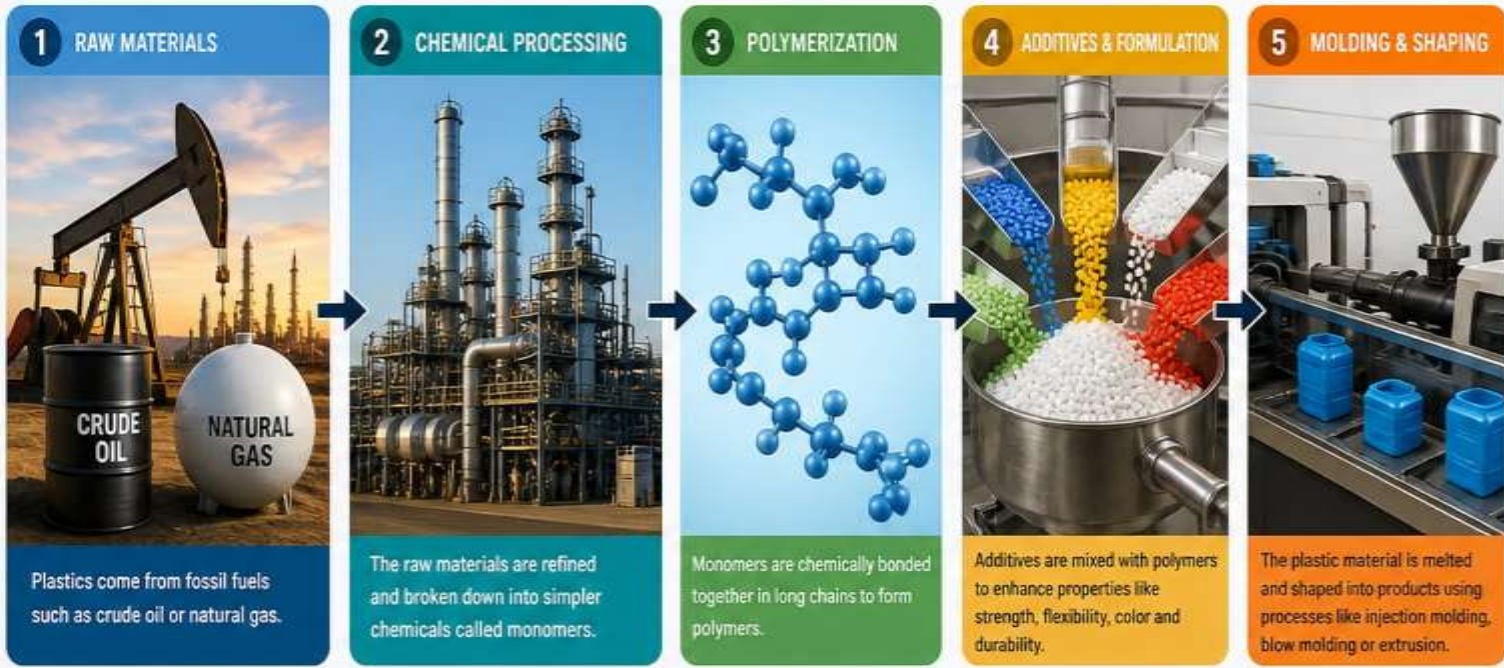

SWITCH TO ECO-FRIENDLY
Better for you. Better for Earth.

CHOOSE PAVITRA DROP9™
PURE INSIDE, GREEN OUTSIDE

HOW PLASTIC IS MADE

Plastics are made from natural resources like petroleum or natural gas. These raw materials undergo a series of chemical processes to become the plastic products we use every day.

RAW MATERIALS

Primary sources:

Petroleum
(Crude Oil)

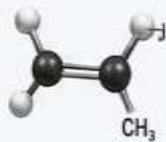

Natural Gas

COMMON MONOMERS

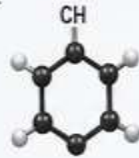

Examples of monomers used in plastics:

Ethylene
(from which Polyethylene is made)

Propylene
(from which Polypropylene is made)

Styrene
(from which Polystyrene is made)

ADDITIVES USED IN PLASTICS

Common additives and their functions:

Plasticizers
Improve flexibility and workability

Stabilizers
Protect against heat, light and oxidation

Colorants
Provide color and appearance

Strengtheners
Improve mechanical strength

Flame Retardants
Increase resistance to fire

EVERYDAY PLASTIC PRODUCTS

From bottles and bags to toys and electronics – plastics are everywhere!

FROM PLASTIC POLLUTION

- ✗ Non-biodegradable
- ✗ Harms wildlife
- ✗ Pollutes our land and oceans
- ✗ Affects our health

THE CHOICE
IS OURS

TO ECO-FRIENDLY SOLUTION

- ✓ Biodegradable
- ✓ Safe for wildlife
- ✓ Keeps our land and oceans clean
- ✓ Better for our health

✗ THROW AWAY PLASTIC,
THROW AWAY THE FUTURE.

✓ CHOOSE ECO-FRIENDLY,
CHOOSE A BETTER FUTURE.

Made from Nature. Made for a Better Tomorrow.

Our eco-friendly water bottles are crafted using natural, safe and sustainable ingredients.

RICE HUSK FIBER

A natural by-product of rice processing.
Provides strength and durability.

SUGARCANE FIBER

Renewable and biodegradable source.
Adds natural texture and resilience.

CORN STARCH

A plant-based material that acts as
a natural binder.

CASTOR OIL

A plant-derived oil used for its
natural bonding properties.

NATURAL ADDITIVES

Mineral-based, non-toxic additives
to enhance performance and safety.

BIODEGRADABLE POLYMERS

Plant-based polymers that break down
naturally and are kind to the environment.

All ingredients are non-toxic, BPA-free, and safe for you and the planet.

VISION

A future where every sip supports
a **healthier you** and a **greener planet**.

for Generations

**PAVITRA
DROP9™**
PURE INSIDE,
GREEN OUTSIDE

MISSION

PAVITRA DROP9™ is on a mission to replace plastic bottles with eco-friendly, reusable bottles for a healthier you and a greener planet.

REPLACE PLASTIC

Phase out single-use plastic bottles by offering sustainable alternatives.

PROTECT NATURE

Reduce plastic waste and its harmful impact on our environment and wildlife.

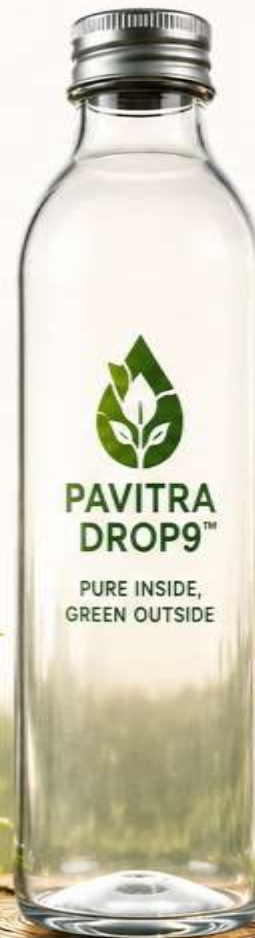

PROMOTE HEALTH

Provide safe, toxin-free bottles for clean and healthy hydration.

BUILD A SUSTAINABLE FUTURE

Encourage eco-conscious choices today for a better tomorrow.

CHOOSE SUSTAINABILITY

SAY **NO** TO PLASTIC

CHOOSE PAVITRA DROP9™

BPA FREE & TOXIN FREE

DURABLE & REUSABLE

REDUCE PLASTIC WASTE

BETTER FOR YOU, BETTER FOR EARTH

TOGETHER, LET'S BUILD A PLASTIC-FREE TOMORROW.

Thank You!

Together, let's choose better
for a **greener tomorrow.**
